Panchkula, Haryana

AI/ML Engineer

LinkedIn **GitHub**

SUMMARY

AI/ML Engineer with experience building LLM-powered systems, document intelligence workflows, and scalable data pipelines in startup environments. Skilled in NLP, embeddings, retrieval systems, and AI automation workflows, with hands-on experience designing and deploying AI products from early-stage concept to real-world beta validation.

EDUCATION

INDIRA GANDHI UNIVERSITY, MEERPUR

Bachelor of Technology (CSE)
2019 – 2023

SKILLS

- **AI/ML:** LLMs, Generative AI, NLP, RAG Pipelines, Embeddings, Prompt Engineering, Fine-Tuning (LoRA), Open-Source Models (Mistral, LLaMA, DeepSeek), Scikit-learn, TensorFlow, Model Evaluation, Feature Engineering
- **Backend & Data:** Python, FastAPI, Flask, REST APIs, Pandas, NumPy, SQL, Supabase, PostgreSQL, Data Pipelines, API Integration
- **Tools & Platforms:** Git, GitHub, Streamlit, Vector Databases, OCR (Tesseract), PyMuPDF, pdfplumber

CERTIFICATIONS

- Introduction to ML in Production – DeepLearning.AI (2023)
- Introduction to LLMs – Google (2023)
- Introduction to Gen AI – Google (2023)
- Prompt Engineering for ChatGPT – Vanderbilt University (2023)
- Introduction to ML – IIT Kharagpur (2022)

PROFESSIONAL EXPERIENCE

Razonica | AI/ML Engineer

Mar 2025 – Present

- Built LLM-powered automation and NLP systems for transforming unstructured business data into structured insights.
- Developed scalable Python pipelines for data ingestion, preprocessing, semantic matching, and workflow automation.
- Designed end-to-end ML workflows covering experimentation, evaluation, optimization, and AI-assisted decision systems.
- Contributed across AI engineering, backend workflows, and data infrastructure in a 0→1 startup environment.

INTERNSHIPS

Data Science & AI Intern | Gilbert Research Center

Jul 2024 – Dec 2024

- Worked on AI models for medical imaging, diagnostics, signal processing, and healthcare prediction systems.

Machine Learning Intern | Feynn Labs

Jun 2023 – Aug 2023

- Developed ML models, performed data preprocessing, visualization, and consumer behavior analysis using Python.

Machine Learning Intern | iNeuron.ai

Mar 2023 – Oct 2023

- Built ML projects including phishing domain detection, book recommendation systems, and Amazon sales trend analysis using Python and Microsoft Power BI.

PROJECTS

ShieldScan AI – AI-Powered Legal Risk Analyst

- Built a multi-stage LLM pipeline for contract analysis, clause extraction, legal risk detection, and plain-English summaries.
- Engineered OCR-enabled document processing, intelligent model routing, concurrent workflows, and secure zero-persistence report generation.

Candidex AI – AI Resume Screening Platform

- Developed an AI-powered resume evaluation system combining ATS scoring with LLM-based candidate assessment and interview recommendations.
- Built recruiter analytics dashboards, resume parsing pipelines, authentication workflows, and resilient LLM fallback handling.
